## ☰ OBJECTIVE

I am a frontend developer with experience writing websites that match up to designs as provided by designers. I would like to grow my skills by building more real world apps that not only look great on all devices but also have a native feel no matter the browser being used.

## 🎓 EDUCATION

### Responsive web design certification | FreeCodeCamp

MARCH 2020 – APRIL 2020

Successfully created 5 projects to acquire this certification after months of working through the lessons before getting started on the projects.

### JavaScript algorithms and data structures | FreeCodeCamp

APRIL 2020 – MAY 2020

I acquired this certification by putting my JavaScript skills to the test, I combined my ES5 and ES6 skills to complete 5 projects required for the certification.

### Computing | Zambia center for accountancy studies

JUNE 2015 – DECEMBER 2016

Acquired my certificate after meeting requirements by delivering a hotel app in Visual Basic.

## 💼 PROJECTS

### Frontend developer | https://github.com/ShadeB/betterment.com-clone-redo

Banking app clone with HTML, CSS and JavaScript. The site is a fully progressive web app leveraging on service workers to create a native feel for users regardless of their internet speed. I also learned how to create a website that meets the Search Engine Optimization (SEO) guidelines.

### Frontend developer | https://github.com/ShadeB/TICKYBOT-CLONE

Tickybot landing page clone made in JavaScript, HTML, CSS grid, and CSS flexbox. I took on this challenge so I could learn how to work with SVG's on a real world site. This was also an opportunity for me to learn how to use the intersection observer API to check the scroll position of DOM elements efficiently.

**Frontend developer | [https://github.com/ShadeB/four-card-feature-section](https://github.com/ShadeB/four-card-feature-section)**

Solo project written in HTML, CSS, CSS grid and CSS flexbox. This project was interesting as it has a layout that isn't as easy to get done without the use of modern CSS technologies.

## SKILLS

- HTML5
- CSS
- SASS
- Bootstrap
- JavaScript ES5 & ES6
- Git
- Angular

## ACTIVITIES

I was mentor and a participant in the Google Africa Developer scholarship. I decided to participate as a mentor so I could help out other learners while also helping myself solidify my skills as a frontend developer.

In my spare time I enjoy reading books, watching movies, and playing games.
